

Nathan Grognet

Profile

Product owner experienced in UX design and web development. Expert at bridging tech and business, aimed at creating amazing products and drive innovation as product owner, product manager, or UX designer.

Work Experience

Product Owner — Stanley / Stella Jan 2023 — July 2023

- Managed product development lifecycle, from user stories to user testing, collaborating cross-functionally and gathering feedback from stakeholders

Product Owner — Odoo Sep 2018 — Nov 2022

- Coordinated the development of 1700+ features and improvements across multiple apps, designing them through wireframes, mockups, and iterative prototypes
- Designed product roadmaps, conducted user tests and gathered feedback to translate into user stories, improving UX and onboarding
- Led 60+ developers across 6 teams, in-house, remotely, and offshore
- Yielded a 53% average annual increase in framework features through the first 3 years, prioritising cross-app business needs while handling feature requests from other product owners
- Manifested significant technical expertise to foster collaboration and efficiency working with both front- and back-end developers

Business Analyst — Odoo Oct 2017 — Aug 2018

- Assessed client needs and integrated the Odoo ERP into 15 different projects across various industries
- Conducted pre-sales ROI analyses for larger projects

Education
